

# MaxiLac 160

## Dairy Mineral Supplements

*Supplements to Sustain Herd Health & Performance*

### What is MaxiLac 160 for Dairy Cows?

**MaxiLac 160** is a highly concentrated mineral supplement pellet formulated for dairy cows in all stages of lactation to ensure the correct intake of essential macro and micro minerals and vitamins. **MaxiLac 160** is ideal for herds on a lower input system (less concentrates) and provides the required balance of minerals, vitamins and buffers for good performance.

### MaxiLac 160 has the following benefits:

#### *Calcium, Magnesium and Phosphorus*

These macro minerals are essential to maintain health during lactation. **MaxiLac 160** has levels of macro minerals to support the production of 7500 litres of milk per lactation.

#### *Microminerals*

Microminerals need to be fed in a balanced manner to avoid deficiencies, which can have a profound effect on production and fertility. The Microminerals in **MaxiLac 160** are specifically formulated to ensure maximum absorption and utilisation.

#### *Vitamins*

We include vitamins A, D and E at elevated levels in **MaxiLac 160**. Our experience supports these higher inclusions, to ensure easier calvings, improved calcium absorption in mid and late lactation, high health status through lactation and encourages a speedy transition to full production in the next season.

## Recommended Dose Rates for MaxiLac 160:

The dose rate of **MaxiLac 160** varies with the level of cow production. A full dose recommendation is 160 grams/cow/day.

The inclusion rates per head per day are:

Production (litres per day)	25	28	31	34	37
Supplementary Feed Inake	4	5	6	7	8
<b>MaxiLac 160</b> (gms/day)	100	115	125	135	160
Inclusion rate (kg/T finished feed)	25	23	21	19.2	20

**MaxiLac 160 is Available in 25kg bags, Bulka bags**
