

DairyLick

Supplements to Sustain Herd Health & Performance

AMS **DairyLick** is a dry, water resistant formulation supplying essential minerals and vitamins for young stock and dry cows

AMS **DairyLick** contains the macrominerals, Calcium, Phosphorus and Magnesium, to support the growth and development of calves and yearlings, and meets the gap in mineral nutrition for cows between dry off and calving.

AMS **DairyLick** also contains the microminerals, Zinc, Copper, Cobalt, Selenium, Manganese, and Iodine and the vitamins A,D, and E as well as Biotin for hoof development and strength.

AMS **DairyLick** supports improved development of dairy replacement heifers by enhancing skeletal development (long bones), hoof development and body condition which leads to subsequent improved conception rates.

AMS **DairyLick** should be offered to all stock in open troughs or self feeders. It is designed for a daily intake of 100 grams/head. In showery or wet weather troughs should be checked daily.

*Please note: Initially salt may be added to AMS **DairyLick** to prevent intakes exceeding 100 grams per head per day*

20 KGS Bags
